4.1.1 Availability of adequate infrastructure and physical facilities viz., classrooms, laboratories, ICT facilities, cultural activities, gymnasium, yoga centre etc. in the institution

The academic year of 2018–2019 saw the establishment of DJPS College of Pharmacy. Our institution is dedicated to offering the stakeholders high-quality services, and in order to do this, we work hard to give the greatest infrastructural support. Since its founding, the institution has maintained strict adherence to PCI and university regulations, maintaining high standards, and built a building that is suitable for offering a variety of pharmacy courses. The college's seminar halls and classrooms are well-lit and kept up for efficient lecture delivery. Modern audiovisual equipment is installed in classrooms in addition to conformist teaching aids, elevating the quality of the teaching-learning process. For slow learners, separate tutorial rooms are available to help them achieve better academically.

As required by law, the institution contains a sufficient number of expertly constructed, immaculate, and well-maintained labs. To ensure that UG courses run smoothly in accordance with the academic year timetable, all labs are constructed and maintained in accordance with PCI regulatory standards. The Central Instrumentation Room and Machine Room, equipped with advanced equipment and a backup power supply, are air-conditioned spaces that foster a research atmosphere among academics and students.

The institute features a well-equipped language lab and computer room with well-configured PCs in addition to other IT equipment such multimedia systems, printers, and scanners. Our institution provides teachers and students with access to high-speed Internet, which enables them to access a variety of national and international e-journals that provide up-to-date knowledge in their particular disciplines.

Several plant species are accessible at the institution's medicinal plant garden, which supports research and teaching. The institute's library, which serves as a knowledge centre, is home to an extensive collection of books, periodicals, journals, and magazines. Additionally, there is a stand-alone e-library with resources including e-book and e-journal subscriptions (Del-Net). Students may access hardbound volumes and issues of different periodicals for reference.

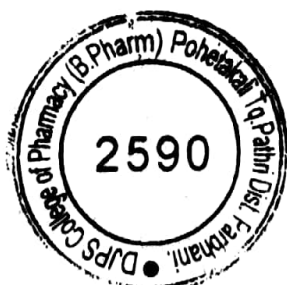

Emergency assistance is accessible from the medical help desk.

With all the facilities needed for both indoor and outdoor sports, the institution is well-equipped to help students strike the right balance between work and pleasure. Various academic and cultural events are held to support students' overall growth.

Students' body mass is examined as well as their overall health and fitness are routinely assessed. There are counselling sessions on the importance of both physical and mental wellness.

There is a large area for outdoor activities and enough space within for gaming. The leisure room is kept up well and is used for indoor activities such as chess and TT.

The school hosts and takes part in a variety of cultural events as well as interdepartmental, intercollege, and interuniversity competitions. A variety of memorial days, lectures, and workshops are held to bring out the best in pupils. Through the planning of sports, games, and cultural events, yearly social gatherings, college days, goodbye parties, and other events, students' latent abilities are discovered and nurtured.
